

The compact, ergonomic and accurate platform to visually analyse water samples

Contour Comparator

The new Contour Comparator offers an excellent solution to visual testing requirements. Features include:

- Compact size with grip feature for ease of handling
- Discrete colour disc for definite results
- Single and dual parameter kits including reagents and accessories

The Contour Comparator is suitable for professional and occasional use. The unique contoured rear of the comparator is designed for comfort and grip in even the most challenging environment.

Contour Comparator colour discs utilise the high quality digital print technology and performance of the existing Palintest range of comparators, packaged into a smaller footprint. Discrete colour 'petals' ensure the colour decision is as simple as possible, guaranteeing definite results.

A starter pack of Palintest comparator tablet reagents is provided in the Contour Comparator kit along with crushing rod, cleaning brush and test tubes. Replacement reagent packs are available from our extensive range of distributors and stockists.
